

Personal Statement – ASNM Board of Directors

Danielle Stewart, CNIM, CNCT, CMA

I am honored to be considered for a position on the ASNM Board of Directors. As a practicing Neurophysiologist in IONM, and instructor and preceptor for a training and internship program, and the founder of a community platform serving neuromonitoring and neurodiagnostic professionals worldwide, I have spent my career working at every level of this field – in the OR, in the “classroom”, and in space where our profession gathers to ask questions, share knowledge, and support one another.

My clinical work has given me a grounded understanding of the day-to-day realities’ technologists and clinicians face, while my roll training incoming professionals has shown me firsthand where our field’s onboarding, education, and mentorship gaps exist; and what it takes to close them. That perspective has directly shaped my work as Chair for the Digital Engagement Committee, where I’ve focused on how the society communicates with, and shows up for, it’s members online.

Outside of ASNM, I built and continue to run a community platform for the IONM/neurodiagnostic community from the ground up. Starting as a small effort to connect isolated professionals and growing it into a resource reaching techs and clinicians internationally. That experience has taught me a great deal about what our members actually want from professional organizations: accessible resources, transparent communication, real opportunities to connect, and a sense that the organizations representing them understand their day-to-day work. I bring that same member-first mindset to how I think about ASNM’s future.

If elected, I would bring a builder’s approach to the Board, someone comfortable identifying gaps, proposing practical solutions, and doing the hands-on work to see them through. I want to help ASNM continue to grow as a Society that is not only professionally rigorous, but genuinely responsive to the people who make up its membership. I would be grateful for the opportunity to serve.
